

Bergantino Audio NV115 Speaker Cabinet

NV115 'New Vintage' Series 1-15" & 1-6" Midrange Bass Guitar Loudspeaker

Unique in the Bergantino Audio Systems line of speakers are the New Vintage NV series of bass guitar speaker cabinets. The NV series cabinets are sealed (rather than the traditional ported design) which provides the NV cabinets with a tighter and more immediate bass response. The cabinetry on the NV series employ a precision tuned cabinet architecture and the enclosures are built with the finest 100% Baltic birch plywood. The NV series are covered in traditional tolex for durability (no more carpet fuzz for your cat to claw) and they all employ a rigid black grille to protect the drivers.

The internal components used are extremely high quality and they are of Bergantino design. No 'off-the-shelf' parts are used. Woofers have ceramic magnets with vented pole pieces and the low-end on this series of cabinets is full and round. The NV series have remained a favorite of finger style and pick players because of the tight-creamy low end found with these cabinets. The NV115 incorporates a 6" midrange mated to a custom phase-coherent crossover network that extends the range of the cabinet up to 6.5KHz. Want a little more clarity and open sound, but don't like tweeters? This is THE cabinet for you! Sounds great with tube amplifiers (pull out the V4B, Model T, Hiwatt, etc.) and this cab will make you smile. Vintage heaven!

- Woofer: 1-15" Ceramic Magnet Woofer w/ Vented Pole Pieces
- Midrange: 1-6" Intelligibility NV Series Cone Midrange Driver
- Cabinet Design: Sealed
- Cabinet Material: Baltic Birch Plywood
- Cabinet Covering: Black Tolex
- Impedance: 8-ohms
- Power Handling: 400W RMS
- Crossover: Custom Phase-Coherent Crossover
- Frequency Response: 45Hz – 6.5KHz
- Sensitivity: 96db @ 2.83v / 1-meter
- Dimensions: 24"H x 18-1/2"W x 15"D
- Weight: 53 Lbs.
- ProNet Price: \$899.00

Accessories: Optional Padded Cover Available
